

Atlas Rubicon K-12 Curriculum Maps

The Clarenceville School District is excited to announce the launch of the Atlas Rubicon K-12 district curriculum mapping system. This system allows students, parents and educators to easily view the curriculum expectations of each grade level and subject in the core content areas. We believe that this valuable tool will provide a consistent, clear understanding for all stakeholders of the teaching and learning that takes place in our classrooms.

The maps in the Atlas system are the result of the collaborative effort of Clarenceville's K-12 teaching staff, administrators and Oakland Schools, who spent many hours reaching a consensus on the curriculum and creating this two-dimensional graph of instructional planning. The curriculum in Atlas not only meets but often exceeds the state standards. Educators worked together in various groupings, beyond the scope of grade level and subject area, to make certain the content provides the foundation for ensuring that each student will make no less than one year's growth in one year's time and that all students will achieve at a high level.

Clarenceville's Atlas curriculum maps provide a vital communication link between school and home to provide parents an overview of what is being taught in the classroom. You will be able to view a list of main topics, essential questions, content, and skills for each core subject at each grade level. Utilizing Atlas Rubicon, parents and guardians will have an opportunity to reinforce at home the focus of learning that takes place at school.

While it is difficult for a two-dimensional map or graph to capture the multi-dimensional teaching and learning that takes place each and every day, Atlas Rubicon will be continuously reviewed and adjusted to meet the needs of our learners.

We hope that you will utilize Atlas and provide us with feedback as we strive together to fulfill Clarenceville's mission of *providing individuals a variety of educational opportunities that enable them to become lifelong learners and productive members of a changing world.*

To access this powerful tool click on the Atlas Rubicon K-12 link on the District's Curriculum and Assessment page and follow the directions below.

*To explore **grade level** and **course information** in detail click on the **Reports** tab.*

*Once there you will click on **Scope and Sequence** and then click on **Choose Courses**.*

*In the **Filter Box** on the left hand side of the screen you will choose the **grade level** and the **subject** or **subjects** and then click on the **browse** button.*

*Once the courses come up on the right hand side of the screen you need to **check off the ones you want** and click on the **close** button.*

*You will then select your **Mapping Category** - (e.g., *key concepts, content expectations, focus questions, unit abstracts, etc.*) within the **Scope and Sequence Report** and then click on **View Report***
